## Profile

Computer Engineering graduate who started out as a Full Stack Developer, gaining experience in building complete web applications from front to back. Over time, I found myself more drawn to front-end development and decided to focus on it—especially using Angular and TypeScript. I'm currently sharpening my skills daily, working with tools like RxJS, HTML, CSS, and Git. I enjoy writing clean, maintainable code and collaborating in team environments to build smooth, responsive user interfaces.

## Experience

### **FRONTEND DEVELOPER (ANGULAR) EX: [ABDULLAH.ABULHOUF90@GMAIL.COM](#) (TEAM LEADER) - IDEAL INNOVATION HOUSE**

January 2025 - Present

I'm currently interning at IIH (Ideal Innovation House) — a leading outsourcing company — where I'm gaining hands-on experience in front-end development. During my internship, I've developed a deep understanding of Angular, covering all its core concepts in detail. I've also worked on two real-world projects using Angular, which helped me strengthen both my technical skills and practical problem-solving abilities.

### **Full Stack Web Development Intern - Orange Coding School EX: [gt.ahmad.zytoon@orange.com](#) (TEAM LEADER) - Orange Jordan**

May 2024 - Aug 2024

Completed an intensive internship focused on full-stack web development. Designed user-friendly interfaces through UX/UI practices and developed responsive web pages using HTML, CSS, Bootstrap, and JavaScript. Built and maintained server-side applications with ASP.NET Core and C#, and managed data using SQL. Used Git and GitHub for version control and collaboration. Took the lead on and contributed to several full-stack projects, applying both front-end and back-end skills in real-world scenarios.

## EDUCATION

Bachelor of Computer Engineering -Yarmouk University 2019- 2024

## SKILLS and Core Competencies

### Front-End Development & Technical Skills

Proficient in Angular (v2+), TypeScript, RxJS, JavaScript (ES6+), HTML5, CSS3, and SCSS. Experienced in building responsive, user-friendly interfaces using component-based architecture, reactive and template-driven forms, Angular CLI, and RESTful APIs. Strong understanding of UI/UX principles, performance optimization, and debugging.

### UI & Design

Skilled in designing clean, accessible, and responsive user interfaces using Angular Material and modern design practices.

### Version Control & Tools

Experienced with Git, GitHub, and Visual Studio Code for efficient development and team collaboration.

### Back-End Development (Basic)

Basic knowledge of ASP.NET Core and C#, with experience in building simple APIs and handling server-side logic. Familiar with SQL for writing basic queries and designing simple database structures. Understanding of object-oriented programming (OOP) principles.

### Soft Skills & Work Ethic

Fast learner with strong problem-solving skills. Effective communicator and team player, with experience working in Agile/Scrum environments.

## PROJECTS

### HOTELS MANAGEMENT SYSTEM (ANGULAR WEB APP)

[Github](#)

Developed a role-based Hotel Management System using Angular, designed for admins, employees, and customers. The system included features such as room and hall reservations, service requests, and user access control.

Implemented core functionalities including authentication, lazy-loaded routing, and a modular architecture with reusable components and services. Used reactive forms

Led the development of the admin and customer interfaces, focusing on booking workflows, request handling, and dashboard UI. Emphasized maintainable SCSS styling, consistent layout structure, and component reusability.

### MANAGEMENT SYSTEM WEBSITE (ANGULAR WEB APP)

[Github](#)

A web-based application developed using Angular that allows for full user management. It includes features such as user login, adding new users, viewing detailed information, editing existing users, and deleting users. The project reflects solid understanding of Angular and implementing basic CRUD operations.

## **TO DO LIST (ANGULAR WEB APP)**

[Github](#)

An Angular-based task management application that includes a note section with support for external links, and a Trello-style board with “To Do”, “Doing”, and “Done” columns. Users can move tasks between columns and upload images for each task. The project showcases skills in dynamic UI design, drag-and-drop functionality, and Angular component interaction

## **Here-toYou E-commerce (Full stack WEB APP)**

[Github](#)

online gifting platform, which is meant to solve the problem of how to choose the right gift It presents to the users a variety of gifts which are categorized in the basis of occasion – Here To You –, and to make shopping as easy as possible, the site has a very convenient interface and fast navigation

## **Furniture Selling Website (Full stack WEB APP)**

[Github](#)

online gifting platform, which is The E-commerce Platform is an online store that allows users to browse, search, and purchase products in various categories. It serves both customers and administrators, offering tools for product management, order handling, and customer communication. to solve the problem of how to choose the right gift It presents to the users a variety of gifts which are categorized in the basis of occasion – Here To You –, and to make shopping as easy as possible, the site has a very convenient interface and fast navigation

## **SAUDI-DESIGN-AGENCY Website (Frontend web page)**

[Github](#)

Built a responsive landing page from a Figma design using HTML, CSS, and JavaScript. Focused on pixel-perfect layout, responsiveness, and clean code structure as part of front-end practice.
